

Problemas para realizar escuta/sussurro

Verificar o arquivo `extensions_fnc.conf` na pasta `/etc/asterisk/`

Conferir se o contexto [monitoramento] está da forma abaixo:

(SIP)

```
[monitoramento]
;Escuta bqW
exten => _S20X.,1,Set(TIMEOUT(absolute)=3600)
same => n,ChanSpy(SIP/${EXTEN:3},bq)
same => n,HangUp()
exten => _S21X.,1,ChanSpy(SIP/${EXTEN:3},bqW)
same => n,HangUp()
exten => _S22X.,1,ChanSpy(SIP/${EXTEN:3},bqB)
same => n,HangUp()
exten => _S23X.,1,ChanSpy(SIP/${EXTEN:3},bqW)
same => n,HangUp()

[fncauto]
include => features
include => monitoramento
```

(PJSIP)

[monitoramento]

;Escuta bqW

exten => _S20X.,1,Set(TIMEOUT(absolute)=3600)

same => n,ChanSpy(PJSIP/\${EXTEN:3},bq)

same => n,HangUp()

exten => _S21X.,1,ChanSpy(PJSIP/\${EXTEN:3},bqW)

same => n,HangUp()

exten => _S22X.,1,ChanSpy(PJSIP/\${EXTEN:3},bqB)

same => n,HangUp()

exten => _S23X.,1,ChanSpy(PJSIP/\${EXTEN:3},bqW)

same => n,HangUp()

[fncauto]

include => features

include => monitoramento

Caso não esteja, substituir o contexto no servidor pelas informações acima.
