

Verificação de logs

Logs de importação:

```
cd /var/www/html/siscrm/tmp
```

Remover arquivos log

```
cd /var/log/asterisk/
```

```
ls -ilh
```

```
rm -vf messages
```

```
rm -vf full
```

```
cd /var/log/postgresql/
```

```
ls -ilh
```

```
rm -vf postgresql-14-main.log.*
```

```
df -h
```

```
service postgresql restart
```

```
service apache2 restart
```

-> elimina todos os processos referentes ao php

```
killall php
```

```
systemctl restart postgresql.service
```

```
ps aux | egrep -i "php"
```

```
service apache2 stop
```

```
service apache2 start
```

```
killall php
```

```
systemctl status php7.4-fpm.service
```

Excluir todos os arquivos mp3 de uma pasta

```
cd /var/lib/asterisk/sounds
```

```
ls
```

```
rm -vf *.mp3
```
